

The Kitchen Layout Plan

- 1. NOODLE PREPARATION COUNTER
- 2. NOODLE & DUMPLING ROOM

Craft

The show kitchen provides the ideal frame in which to present the exciting dumpling and noodle making methods. Located near the center of the dining room, the kitchen will educate diners in the ancient arts of traditional dumpling and noodle making while also providing an energetic and entertaining backdrop to the meal.

Context

Contained in a shape reminiscent of a noodle bowl, the show kitchen is a light-hearted reference to the menu while also breaking up the straight edged boundary of the kitchen.

Character

The bowl will be clad in mosaic tiles. The convex profile of the bowl will distort and animate its surroundings adding life and movement to the boundaries of the space. A pass through window from the show kitchen to the back of house kitchen will allow for efficient movement of plates to the front of house.
