

The Ceiling Reflected Ceiling Plan

- 1. RECTILINEAR FEATURE
- 2. ROUND FEATURE
- 3. PENDANT LIGHT

Craft

The ceiling provides a chance to further enforce the concept in the dining room. Materials similar to those used for traditional dim sum steamer baskets will remind guests of the natural and historic origins of their dishes.

Context

The ceiling will help to weave together the common design thread throughout the restaurant. The holistic approach to the design, made complete by the ceiling, will round off the guest experience that firmly fixes diners' attention on the food and its origins.

Character

By providing a design that takes its major cues from noodles and dumplings, the space will work in harmony with the menu to deliver a carefully considered and well-rounded dining experience. This adds character and depth to the food as guests are reminded of the history of the dishes through most design aspects.
