

FUNCTION AND ZONING ANALYSIS 区域功能分析

SMALL SIZE BASIC SHAPE RESTAURANT

This is the basic floorplan for a small restaurant as per minimum brand standard. The main entrance should be a consistent design and experience for all “Yu Xi” brand restaurants.

Respectively, the main dining area and PDR area should be located at either sides of the main entrance for efficient guest traffic distribution.

The interface wall between the main dining area and the back-of-house is a “must have” design element as well. A modular pod-like showcase area is located in middle of this wall and can feature a show kitchen for specialty food items or showcase of wine or teas.

基本型平面图块分析

此形态为最小餐厅的基本形态。主入口为每个餐厅统一的设计。主入口两边分别为大堂就餐区及包房区，便于最有效率的分流。厨房与大堂就餐区的界面同样为餐厅的必有设计，面对大堂就餐区的中间设有一个展示区，可展示餐厅的特色菜式或点心等，也可作为展示酒窖或茶品之类的展示区。
